

Summer Programs for 2013

Five Day Intensive Programs – designed for explosive results in just one week

Practice Intensive (\$230)

Our most popular program for the last five years, this five-day guided practice intensive immerses students in a practice routine that yields amazing results. Incorporating our revolutionary and effective new “chunk” approach, participants get five days in a row of 60 minute sessions. This is the program that gives students the experience of “how to practice.” We recommend this program to any student that wants rapid improvement.

Practice Intensive for Beginners (\$140)

Similar to the 60-minute Practice Intensive, this program is geared toward beginners. Participants get five days in a row of fully guided 30-minute sessions.

Jazz Improvisation Intensive (\$230)

We have discovered the most effective way to teach students jazz improvisation and this is the program. Participants get five days in a row of 60 minute sessions in which theory and guided improvisation are the focus. This program is our best system for students to get started in jazz and also to improve their improvisation skills.

Studio Recording Intensive (\$230)

With this intensive, students can learn how to use virtual instruments to make recordings in our digital recording studio. Mastering techniques, file conversion and composition are part of this cutting edge experience. Again, participants get five days of 60 minute sessions (note: these sessions don't have to be on successive days).

Theory Intensive (\$230)

This Five Day Intensive focuses on music theory, ear training and notation. Participants get five days in a row of 60-minute sessions.

Other Programs

Twice Weekly (same rate as normal lessons)

Summertime is actually the best time to ramp up lesson participation. Two lessons per week causes students to practice in a more focused way as they set smaller, more attainable goals between lessons and achieve them more easily.

Buddy System (same rate as normal lessons)

This is a great value for those of you who seek longer lesson times at the same price as lessons throughout the year. In this program, you share the time with a teacher along with a practice partner (who is practicing in another room). You get twice the practice time, which is supervised, for the same cost as normal lessons.

** All of our programs are now for individuals as we find one on one sessions to be the most effective way for students to advance.*
